緊定螺絲:

- 限位作用, 防止活動基座上下兩個鎖緊螺絲太緊, 損壞活動基座
- 調整活動基座高度時, 先鬆開兩個鎖緊螺絲, 再用緊定螺絲頂開活動基座
- 活動基座上下移動時, 用於調整與立柱之間的間隙

Set screw:

- Limit spacing function to prevent the upper and lower locking screw of the movable base from being too tight which will damage the movable base
- When adjusting the height of the movable base, loose two locking screws first, and then use the tightening screw to open the top of the movable base.
- In order to adjust the space between the column and the movable base, the adjustment needs to be made when the movable base is moving up and down.
